

Premier Tiny Homes, Inc.
is proud to offer for 2018...

The Smartflower™

Once again Premier leads the way in the tiny house industry by offering the features and options that are not available from other tiny house builders. The Smartflower™ is by far the most efficient solar panel system available anywhere today!

Designed to open in the morning and then close automatically at night and to track the sun during the day, this new self-cleaning multi-panel array is a true marvel of modern technology and engineering. Available in several different configurations with one including a plug to charge your electric vehicle.

Call Premier today to learn how a Smartflower™ can be added to any Premier tiny house model and provide you the benefits of solar!
